SUMMARY

Detail-oriented B.Tech CSE student specializing in data analytics, Power BI, AI-driven automation, and Python-based data workflows. Experienced in building automation pipelines using n8n, APIs, and LLMs, and developing insightful dashboards using Power BI, DAX, and data modeling. Skilled in transforming raw data into actionable insights using Python, SQL, and visualization tools. Seeking a challenging role in Data Analytics / Power BI where I can contribute to data-driven decisions through reporting, automation, and analysis.

EDUCATION

Jawaharlal Nehru College of Technology, RGPV

Rewa, MP

B.Tech in Computer Science; CGPA: 8.11 (Ongoing)

Expected May 2026

- Relevant Coursework: Machine Learning, AI, NLP, DBMS, DSA, Software Engineering, Operating Systems.

EXPERIENCE

AI Generalist Intern

2025

EOXS

Remote

- Engineered B2B automation workflows in n8n that scraped supplier websites, parsed product data using AI, and matched results to internal catalogs—reducing manual effort by 30%.
- Developed an autonomous AI calling agent (Vapi.ai) to conduct customer surveys and automated transcript parsing with structured data logging into Google Sheets.
- Collaborated with cross-functional teams and researched emerging AI tools to implement impactful automation improvements.
- Created internal dashboards and KPI summaries to track automation performance and accuracy.

Data Analyst Intern

2024

NullClass

Remote

- Analyzed datasets of 5,000+ rows using Python (Pandas, NumPy) and SQL to identify trends and business insights.
- Built visualizations and summary reports to support data-driven decision-making.

AI Trainee (Microsoft & SAP – TechSaksham)

2024

Remote

- Developed AI-driven mini-projects and dashboards using Python, SQL, and visualization tools.
- Performed data preprocessing, EDA, and modeling across multiple datasets.

PROJECTS

AI-Powered Outbound Calling Agent | Python, n8n, Vapi.ai

2025

- Developed an AI agent that automates customer satisfaction calls, parses transcripts, and logs structured feedback into Google Sheets.

7-Days, 7-Dashboards Power BI Challenge | Power BI, DAX

2025

- Created 7 dashboards including HR Analytics, Netflix Trends, Sales Forecasting, and Weather Analysis.
- Performed data modeling, DAX measures, time-series forecasting, and KPI creation.

Google Play Store Analysis | Python, SQL, EDA

2024

- Analyzed 10,000+ Google Play apps to uncover patterns in ratings, installs, categories, and user behavior.
- Built visualizations using Matplotlib and Seaborn to derive insights.

TECHNICAL SKILLS

Languages: Python, SQL, C++, HTML/CSS

Data & BI: Power BI, DAX, Power Query, Data Modeling, MS Excel

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Tools & Automation: n8n, Git, GitHub, Jupyter Notebook, Apify, Vapi.ai

Core Concepts: ETL, KPIs, Reporting, EDA, ML Basics, Web Scraping, Agentic Workflows

Soft Skills: Communication, Presentation, Team Collaboration

CERTIFICATIONS

Microsoft & Simplilearn — Data Analyst 101 (2025)

Meta — Generative AI in Data Analytics (2025)

HP Foundation — Data Science & Analytics (2025)

IBM — Data Analysis with Python (2024)

Google — Google Analytics Certification (2024)

AICTE — AI Transformative Learning Internship (2025)
